DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8 and 10-11, drawn to a method of generating a commodity code for each branch and leaf of the classification tree, classified in class 707, subclass 102.
 - II. Claims 12-17, drawn to a method describing an item comprising defining a commodity code, classified in class 705, subclass 29.
 - III. Claims 21-24, drawn to a system comprising catalog means and query means providing a query of the catalog item description fields with a compact item descriptor, classified in class 707, subclass 3.
2. The inventions are distinct, each from the other because of the following reasons:

Invention I-II are related to Invention III as process and apparatus for its practice. The inventions are distinct if it can be shown that *either*: (1) the process as claimed can be practiced by another, materially different apparatus, or by hand, *or* (2) the apparatus as claimed can be used to practice another, materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another, such as cataloging and querying items.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, subcombination I has separate utility such generating a commodity code for each branch and leaf of a classification tree starting with the commodity code for the root and appending as a suffix a unique character or unique sub-string of characters that represent a branch or leaf node at each fork such that the resulting character string uniquely identifies the sequence of branches and leaf node selected for the classification of an item represented by the leaf node . Subcombination II has separate utility such as providing an item description method comprising defining the commodity code and character string. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement, to be complete, *must* include an election of the invention to be examined, even if the requirement be traversed (37 CFR 1.143).
